

## NEW FURNACES DATA SHEET

# ◆ FINECARB® VACUUM CARBURISING AND MULTICHAMBER FURNACES

Vacuum carburising and nitriding in an energy efficient & environmentally friendly fashion

## TECHNICAL INFORMATION

- Seco/Warwick 2-, 3-, 4- or 5-cell Rotary Modular System
- Dual-chamber Oil Quench furnaces
- Dual-chamber HPGQ 20 bar furnaces
- Horizontal- and vertical-loading furnaces
- Equipped with LPC FineCarb® carburising technology and PreNit® pre-nitriding to restrict grain development
- Loads up to 1,200 kg
- Range for mass production of drive systems
- Uniform heating and cooling

- Nozzle quenching system, zone quenching
- Minimizing hardening distortions also with a gradual cooling system
- Computer control system
- Complies with CE and NFPA
- Environment-friendly

We represent Seco Warwick (one of the largest furnace manufacturers in Europe) for their range of Vacuum and Atmosphere furnaces, and are sure to have the type of furnace you require within their product range – see [www.secowarwick.com.pl](http://www.secowarwick.com.pl)
